

CONFERENCE ORGANIZATION WELL ON TRACK

Publication of Conference Proceedings

The **conference proceedings** have been closed and will be published by Springer by the end of the year. Contributions of authors from all over the world (42 countries represented) provide an up-to-date picture of the broad research field of computational geomechanics.

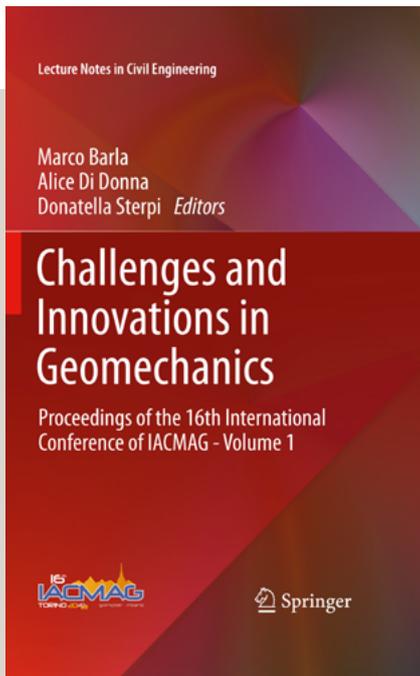

They are included in two volumes of proceedings, together with the keynote and the special lectures that will be presented at the conference.

The **topics** are divided in 4 sections:

- **Methods and tools**
- **Application in geotechnical engineering**
- **Environmental geomechanics**
- **Geomechanics for energy.**

All papers were subjected to a peer-review process and only the accepted ones will be published: 229 papers for a total of roughly 2.000 pages.

A great thanks goes to the authors who have submitted papers to this conference and confirmed their willingness to pursue the publication, despite the unusual boundary conditions, and to all the reviewers, for their tireless support.

KEY DATES NOT TO BE MISSED

Attendees' early bird registration deadline:

March 1, 2021

Pre-conference courses:

May 3-4, 2021

Conference opening:

May 5, 2021

Conference closure:

May 8, 2021

THE REGISTRATION SYSTEM IS NOW OPEN

New Dates, New Venue

Due to logistical reasons, the conference will move from the Politecnico di Torino facilities to the **United Nations** training campus of the **ILO (International Labour Office)**, a prestigious international organization whose venue in Torino hosts every year, in a professionally and culturally stimulating environment, many meetings and training courses with attendees and students coming from all over the world.

The **UN ILO Campus**, which besides well-equipped meeting facilities also houses bars, restaurants, hotel accommodation, post and bank offices, tourist services, etc, is located in a nice, green area on the river Po just a few kilometres from the city centre.

*More information on the venue
can be obtained at:*
