

ISSF6

TORINO 2025

6th

International Symposium on Shallow-Flows (IAHR)

September 15 - 18 2025
Torino, Italy

THE CALL FOR ABSTRACT IS NOW OPEN TOPICS:

1. Turbulence in shallow open channel flows and shallow free shear flows (mixing layers, wakes and jets)
2. Heat and mass transport processes in canonical and realistic shallow flows.
3. Sediment transport and morpho-dynamics in fluvial, coastal and estuarine environments.
4. Stratification effects and gravity currents.
5. Numerical simulations of fluvial and coastal floods.
6. Shallow flows interacting with hydraulic structures and machines.
7. Ecological aspects of shallow flows including hydrodynamics of swimming organisms.
8. Quasi two-dimensional flows in the atmosphere

ABSTRACT SUBMISSION SYSTEM IS AVAILABLE
ON THE CONFERENCE WEBSITE.
